

Surface Mounted Digital Tach/Hour Meter, Series PT15

PT15E2

ENM is proud to present the new series PT15 surface mounted, self-powered Digital Tach/Hour meter. The PT15 keeps track of true engine RPM and running time for all types of gasoline engines. The unit is powered by an internal lithium battery. No external power connection is required. The operation of the Tach/Hour meter is triggered by an external wire lead, wrapped around the spark plug wire of the engine. Since the unit is triggered by the spark of the engine, the hours and the RPM display actual operation. This is useful for maintenance and warranty applications for any type of engine-powered machinery.

The RPM is displayed when the engine is running. Hour usage is displayed when the engine is off and remains visible.

With solid state technology, the PT15 series is built with a custom chip and solid construction for maximum durability in harsh environments and rugged application. The unit is completely sealed with Epoxy compound to protect against the most extreme environmental or vibration applications.

Features

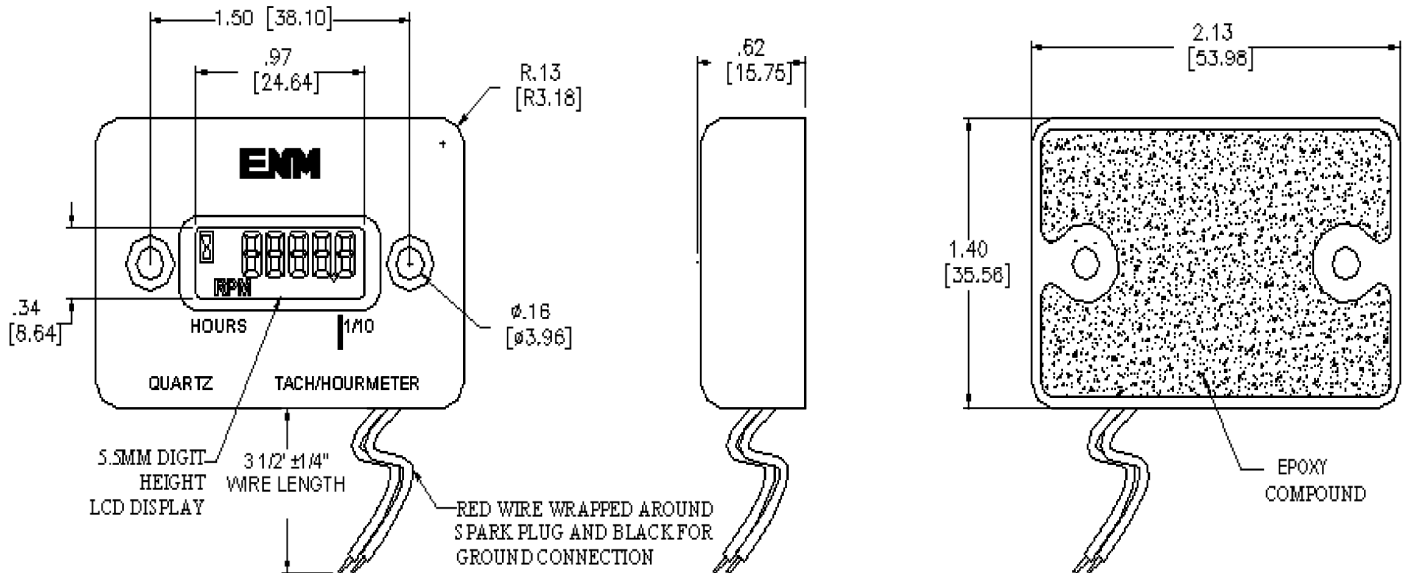

- Surface Mounted or Two-Hole Screw Mounting
- Self-Powered
- Completely Sealed
- Solid State Electronics
- Quartz Crystal
- Wide Operating Temperature Range
- High Reliability
- Indicates Operation in RPMs and Hours
- 1, 2, 4, Cycle Engine RPM or Hour Meter Only
- ISO 9001 2000 Certified
- Made in the U.S.A.

Specifications

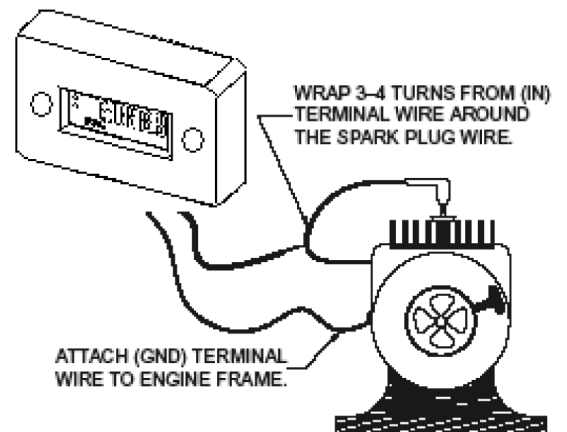

Display Reading:	9999.9 Hours Meter
RPM Capacity:	1 = 13,000 RPM 2 = 24,000 RPM 3 = 48,000 RPM
Character Height:	5mm digits
Sampling Time:	1-second (approximately)
RPM Resolution:	10 RPM
Operating Battery Life:	8-year Internal Lithium Battery
Operating Temperature:	Standard -30°C to +85°C
Vibration Resistance:	Withstands 10 to 75 Hz. at 1 to 8 G's
Mounting Configuration:	Surface Mounted or Two Hole Screw Mounting

2007 ENM Co.®

Series PT15E2

ENM	DESCRIPTION
PT15E1	Sparks twice per engine revolution
PT15E2	Sparks once per engine revolution
PT15E3	Sparks once every two engine revolutions
